Personal Projects

•Personalized Recipe Maker.

-Technologies: Java Swing, SQL, Apache Tomcat Server
-The Personalized Recipe Maker is an innovative and user-friendly tool that helps you create delicious meals based on the ingredients you already have on hand.

•Wind Turbine Health Monitioring System

-Technologies: Python, Jupyter, ML Algorithms.
-The SCADA-Based Wind Turbine Performance Monitoring and Anomaly Detection System evaluates the overall turbine performance by monitoring key parameters of wind turbine and detects performance anomalies, calculates a comprehensive health score.

•AI based calendar and planning system

-Technologies : Reactjs, Tailwind CSS, Git, Supabase
-It is an AI-powered smart management platform developed and designed to help students, faculty, and program coordinators to efficiently manage schedules, Cybersafety awareness events, workshops, meetings, and deadlines through intelligent scheduling, automated reminders, and real-time notifications. By providing a centralized and user-friendly solution, the project enhances collaboration, improves productivity, and supports the effective execution of Cybersafety education initiatives.

Experience

•Quick Heal Technologies

-Worked as a Software Development Intern at the Quick Heal Foundation on an AI-Based Calendar Planner for the Cyber Warrior program. Worked in a team of five members and was responsible for implementing the authentication system and managing the Supabase database. The application uses AI to generate student performance reports.

Technical Skills and Interests

Languages:Java,C#,Python,C++.
Developer Tools:Git, Jupyter Notebook, NetBeans, Visual Studio.
Soft Skills:Public speaking, Teamwork, Quick Learner, Leadership.
Coursework: NPTEL course in Cloud Computing and Soft Skills.

Positions of Responsibility

Served as the President of the Quick Heal Cyber warriors club at GCE, Karad. The Cyber warriors club is an initiative of the Quick Heal Foundation under the Cyber Shiksha for Cyber Suraksha program. I lead a team of 20 warriors including a team of 4 officers in organizing and managing Cybersafety awareness activities at various institutions, organizations and communities.

Currently working in the Core Team of the Aptitude Training Portal Club at GCE, Karad. The Aptitude club conducts aptitude tests for the students within the college to practice and improve their logical, technical and mathematical abilities.

Achievements

•Achievement 1 : Achieved various ranks in Poster Presentation Competition during inter college events.

•Achievement 2 : Research paper "The Study of Digital Crimes in Karad and Satara City" is accepted for publication in a collaborative book.
